Massage- und Badewannen
Fürdőkádak és masszázskádak
Hidromasaj și căzi de baie

Bathtub as a space of intimacy

With the Kolpasan bathtub, you create your personal sanctuary of indulgence and relaxation.
Warm water reduces stress, heightens senses, relaxes us and generally affects our well being.
It becomes our personal space in which to escape from the outside world as well as unleash and restore our internal balance.

Die Badewanne als ein intimer Ort

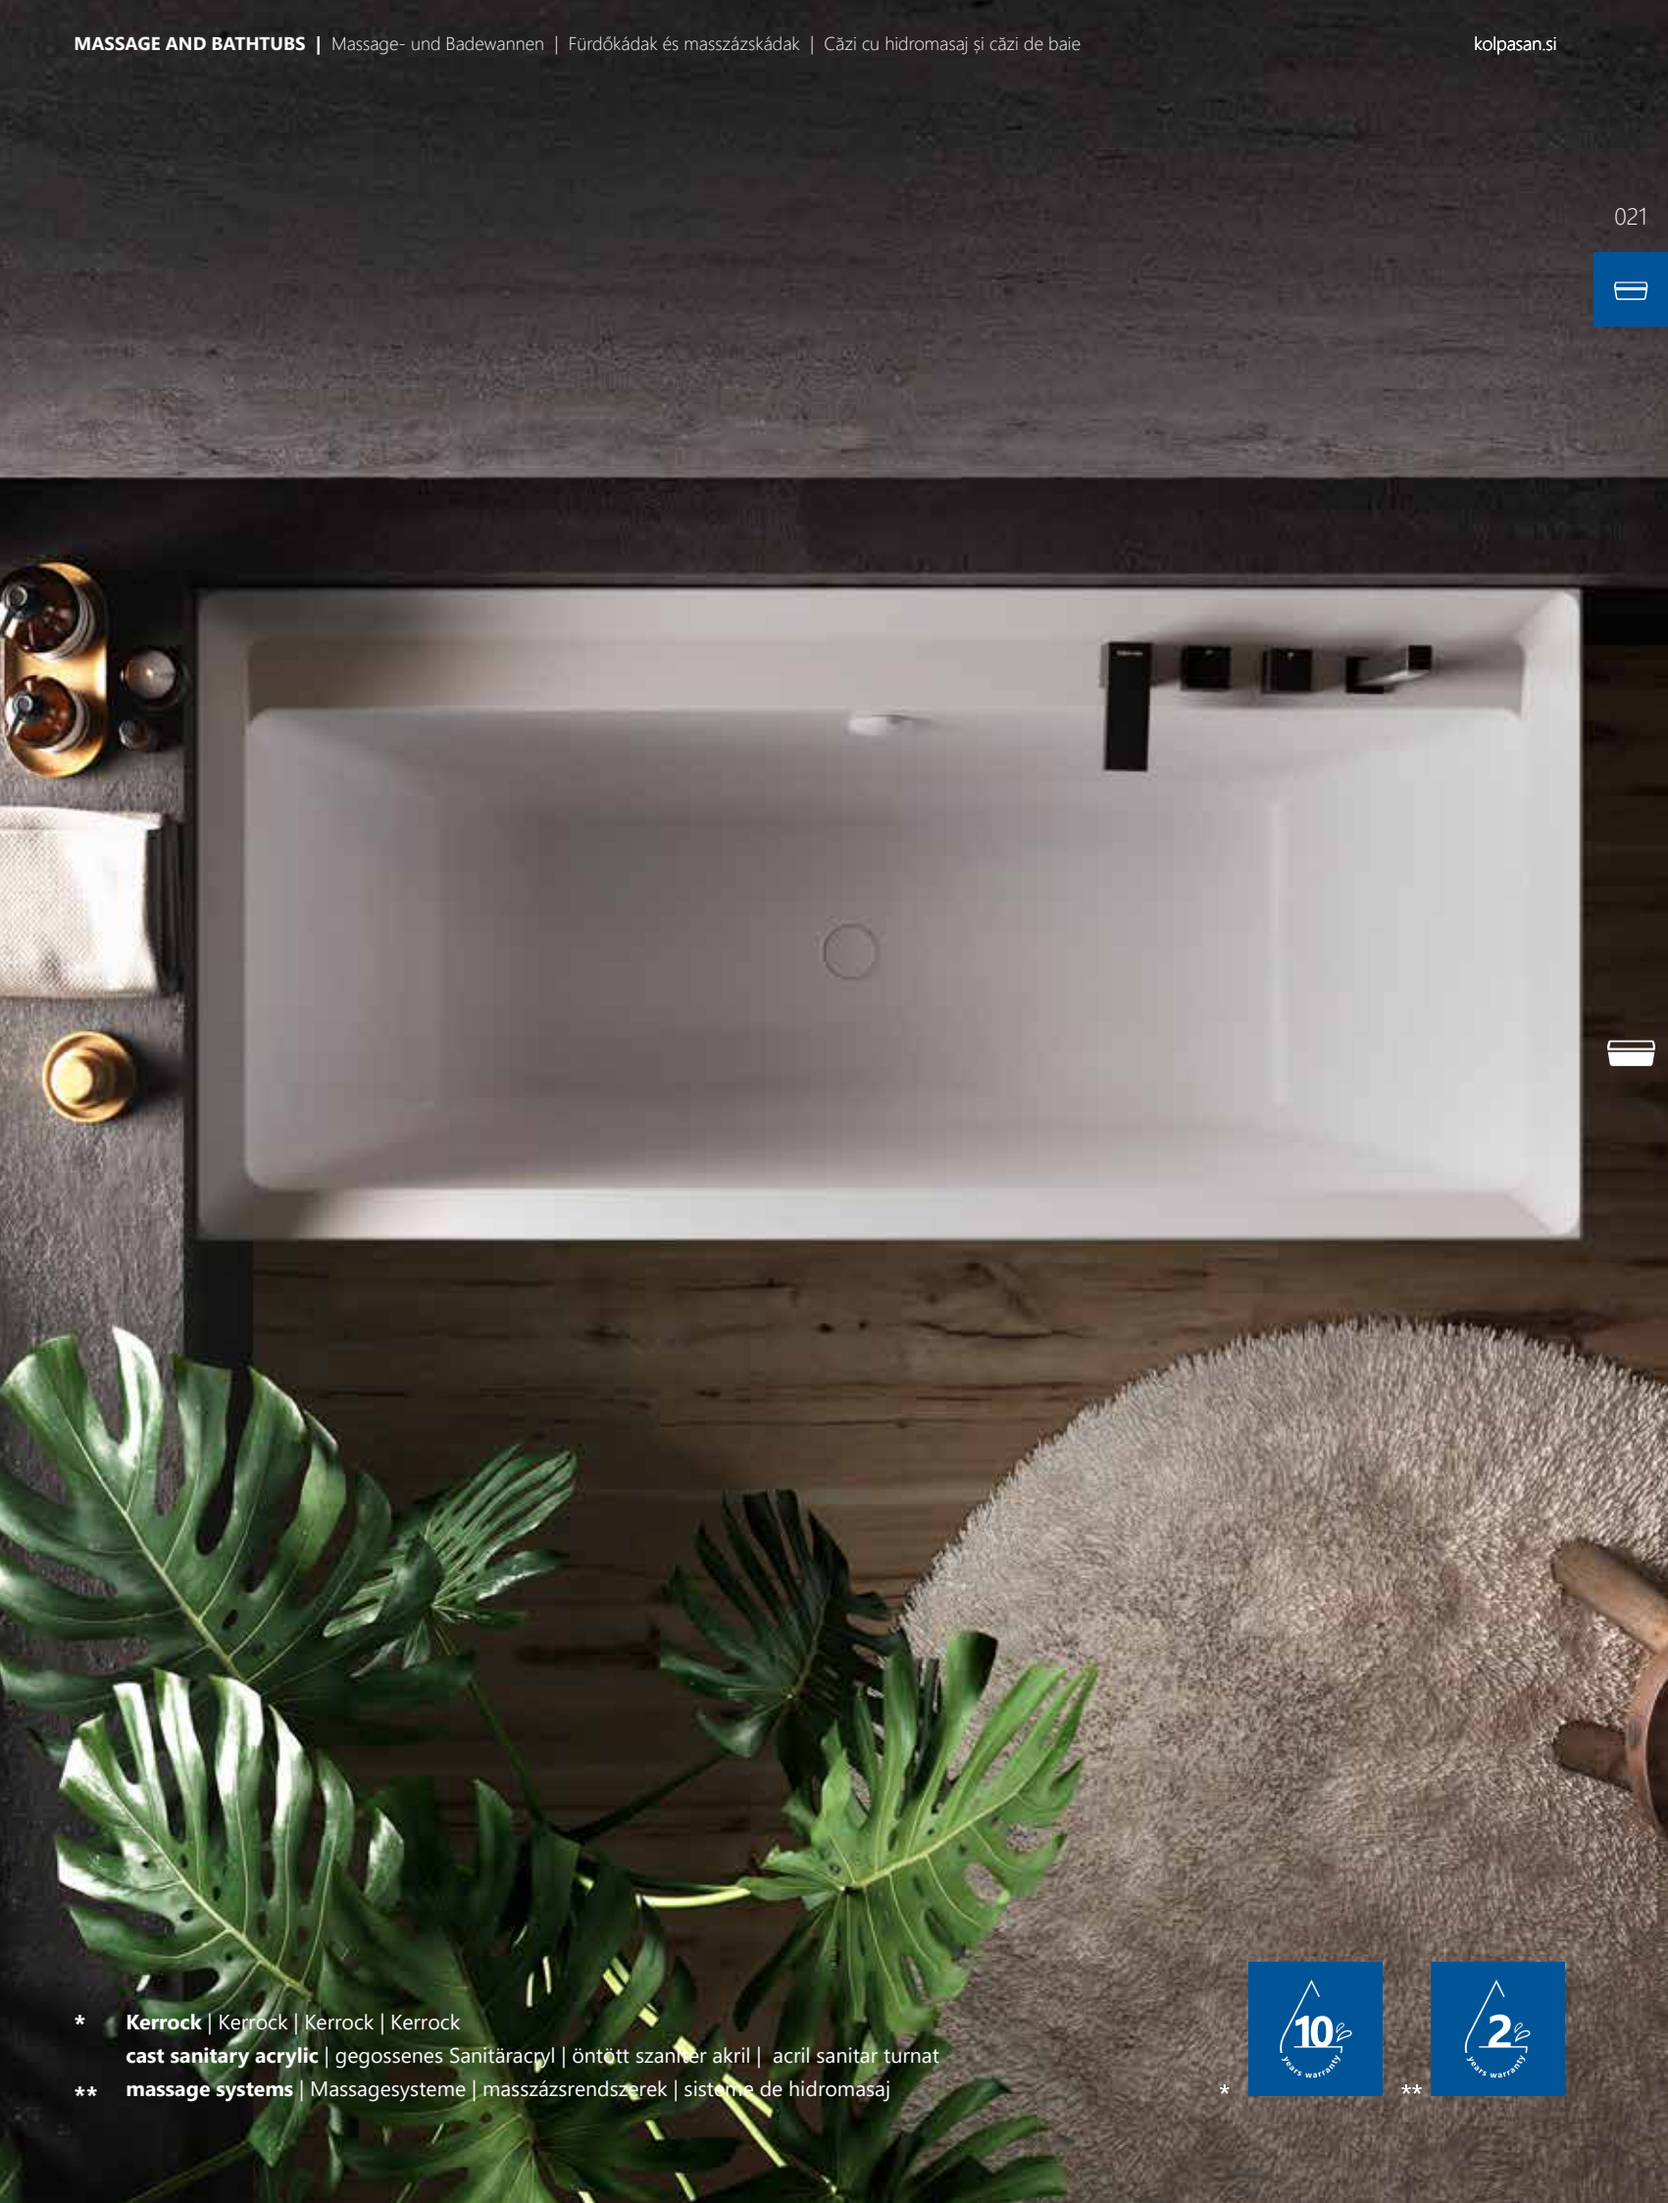

Mit einer Kolpasan-Badewanne schaffen Sie Ihre persönliche Oase der Entspannung.
Warmes Wasser reduziert Stress, schärft die Sinne, entspannt und wirkt sich positiv auf das allgemeine Wohlbefinden aus.
Die Badewanne wird zu einem persönlichen Rückzugsort, in dem man der Außenwelt entfliehen und das innere Gleichgewicht wiederherstellen kann.

A fürdőkád mint intim tér

A Kolpasan fürdőkád kényeztető, megnyugtató és oltalmazó környezetet teremt. A meleg víz enyhíti a stresszt, fokozza az érzékelést, ellazít, és összességében jótékony hatással van közérzetünkre. A fürdőkád az a személyes tér, ahová visszavonulhatunk a külvilág zajától, ahol elengedhetjük magunkat, és helyreállíthatjuk belső egyensúlyunkat.

Cada de baie ca spațiu al intimității

Cu cada de baie Kolpasan, îți creezi sanctuarul personal de răsfăț și relaxare.
Apa caldă reduce stresul, intensifică simțurile, ne relaxează și ne influențează pozitiv starea de bine. Devine spațiul nostru personal în care evadăm din lumea exterioară și ne eliberăm și restabilim echilibrul interior.

Bathtub trimming ATYS 200x100 made from Kerrock
For situations where the architectural properties of bathrooms, especially in the renovation of older buildings, do not allow the installation of classic bathtubs from the regular program, we provide our customers with the possibility of adapting certain bathtubs to their specific requirements. For further information on the models and options, please visit our website **www.kolpasan.eu**

Der Badewannenrand der ATYS 200x100 aus Kerrock
Für Fälle, in denen die architektonischen Gegebenheiten von Badezimmern, insbesondere bei der Sanierung älterer Gebäude, den Einbau klassischer Badewannen aus dem Standardprogramm nicht zulassen, bieten wir unseren Kunden individuell anpassbare Badewannenlösungen. Für mehr Informationen zu Modellen und Optionen besuchen Sie unsere Website **www.kolpasan.eu**

ATYS 200x100 fürdőkádperem Kerrockból
Előfordulhat – különösen régebbi épületek felújításakor –, hogy a fürdőszoba építészeti adottságai nem teszik lehetővé a klasszikus, normál fürdőkádak beépítését. Ilyen esetekben bizonyos fürdőkádakat ügyfeleink egyedi igényeihez tudunk igazítani. A modellekről és a lehetőségekről további információkat weboldalunkon olvashat: **www.kolpasan.eu**

Marginea căzii de baie ATYS 200x100 din Kerrock
În situațiile în care caracteristicile arhitecturale ale băilor, în special la renovarea clădirilor vechi, nu permit instalarea căzilor de baie clasice din programul standard, oferim clienților noștri posibilitatea adaptării anumitor căzi de baie la cerințele lor specifice. Pentru informații suplimentare despre modele și opțiuni, vă rugăm să vizitați site-ul nostru **www.kolpasan.eu**

Antislip coating (only for sanitary acrylic)
Anti-Rutsch-Beschichtung (nur für Sanitäracryl)
Csúszásgátló bevonat (kizárólag öntött szaniter akrilhoz)
Strat antiderapant (numai pentru acril sanitar)

Advantages of the ANTISLIP coating
- non-slip surface in shower trays and bathtubs
- developed for bathrooms, wellness and hotel bathrooms

Vorteile der ANTI-RUTSCH-Beschichtung
- rutschhemmende Oberflächen in Duschwannen und Badewannen
- speziell für Badezimmer, Wellnessbereich oder Hotelbadezimmer

A CSÚSZÁSGÁTLÓ bevonat előnyei
- csúszásmentes felület a zuhanytálcákban és fürdőkádakban
- fürdőszobákhoz, wellness és szállodai fürdőszobákhoz fejlesztve

Avantajele acoperirii ANTIDERAPANTE
- suprafață antiderapantă în căzi de duș și căzi de baie
- dezvoltată pentru băi, zone de wellness și băi de hotel

Improved safety:
- when entering or exiting the shower or bath tub
- during showering and bathing

Verbesserte Sicherheit:
- beim Ein- oder Aussteigen aus der Dusche oder Badewanne
- beim Duschen und Baden

Fokozott biztonság:
- a zuhanyba, illetve fürdőkádba való be- és kilépéskor
- zuhanyzás és fürdés közben

Siguranță îmbunătățită:
- la intrarea sau ieșirea din duș sau din cada de baie
- în timpul dușului și băii

Water massage system (pneumatic)
Wassermassagesystem (pneumatisch)
Vízmasszázs rendszer (pneumatikus)
Sistem de hidromasaj cu apă (pneumatic)

This hydro massage system is based on pressure created by water pump directing water flow through massage jets as mixture of water and air.
As a result, your body is being intensively massaged by thousands of extremely rapidly moving air bubbles.
A regulation system allows controlling air and water flow through the massage jets.

Das Wassermassagesystem nutzt den Druck der Wasserpumpe, um Wasser und Luft durch die Massagedüsen zu leiten.
Tausende schnell bewegte Luftblasen massieren dabei den Körper intensiv und sorgen für ein einzigartiges Entspannungserlebnis.
Ein Regelsystem ermöglicht die Steuerung von Luft- und Wasserstrom durch die Massagedüsen.

A hidromasszázs rendszer alapja a vízszivattyú által keltett nyomás, amely a vízáramot víz és levegő keverékeként a masszázsfúvókákon keresztül irányítja.
Ennek köszönhetően a rendkívül gyorsan mozgó légbuborékok ezrei intenzíven masszírozzák a testet.
A szabályozórendszer a masszázsfúvókákon keresztül vezérli a levegő és a víz áramlását.

Acest sistem de hidromasaj se bazează pe presiunea creată de pompa de apă, care direcționează fluxul de apă prin duzele de masaj ca un amestec de apă și aer.
Ca urmare, corpul dumneavoastră este intens masat de mii de bule de aer care se deplasează extrem de rapid.
Un sistem de reglare permite controlul fluxului de aer și apă prin duzele de masaj.

System functions:
- water pump
- ● water jets
- pneumatic switch
- air flow regulator min-max
- overflow set
- bathtub support frame
- bathtub panel
- ● ○ high performance waterpump, 6 microjets with switch
- ● ○ 2 additional water microjets

Systemfunktionen:
- Wasserpumpe
- ● Wasserdüsen
- pneumatische Einschaltung
- Luftstromregler Min/Max
- Überlaufgarnitur
- Badewannen-Untergestell
- Badewannenschürze
- ● ○ Hochleistungswasserpumpe, 6 Mikrodüsen mit Schalter
- ● ○ 2 zusätzliche Mikro-Wasserdüsen

Rendszerfunkciók:
- vízszivattyú
- ● vízfúvókák
- pneumatikus kapcsoló
- légáram-szabályzó min-max
- túlfolyó készlet
- fürdőkád tartókeret
- fürdőkád előlap
- ● ○ nagyteljesítményű vízszivattyú, 6 mikrofúvóka kapcsolóval
- ● ○ 2 további mikro vízfúvóka

Funcții ale sistemului:
- pompă de apă
- ● jeturi de apă
- întrerupător pneumatic
- regulator de flux de aer min-max
- set de preaplin
- cadru de susținere pentru cadă de baie
- mască pentru cada de baie
- ● ○ pompă de apă de înaltă performanță, 6 micro-jeturi de apă cu întrerupător
- ● ○ 2 micro-jeturi de apă suplimentare

Water and air massage system (electronic)
Wasser- und Luftmassagesystem (elektronisch)
Víz- és levegőmasszázs rendszer (elektronikus)
Sistem de hidromasaj cu apă și aer (electronic)

This system combines both water and air massage systems. Their interacting effect does great work for human organism with pure relaxation and a complete regeneration as a result. The air massage system is based on the air pressure generated by an air pump. The strong flow of compressed air running through the air nozzles results in millions of tiny air bubbles mixing with water and moving at high speed. It is their kinetic energy which provides massage to your body.

Dieses System kombiniert Wasser- und Luftmassagen. Ihr Zusammenspiel wirkt wohltuend auf den menschlichen Organismus und fördert Entspannung sowie vollständige Regeneration. Das Luftmassagesystem arbeitet mit dem von einer Luftpumpe erzeugten Luftdruck. Der starke Strom komprimierter Luft, der durch die Luftdüsen strömt, erzeugt Millionen kleinster Luftblasen, die sich mit Wasser vermischen und sich mit hoher Geschwindigkeit bewegen. Ihre kinetische Energie massiert Ihren Körper.

Z a rendszer a víz- és levegőmasszázs rendszereket együttesen alkalmazza. A két rendszer kölcsönhatása teljes relaxációt és regenerálódást biztosít, így jótékony hatással van az emberi szervezetre. A légmasszázs rendszer működésének alapja a légszivattyú által keltett légnyomás. A sűrített levegő erős áramlása a levegőfúvókákon keresztül milliónyi apró légbuborékot hoz létre, amelyek vízzel keveredve nagy sebességgel mozognak. Kinetikus energiájuk gyengéd, mégis hatékony masszázst biztosít a test számára.

Acest sistem combină sistemele de hidromasaj cu apă și cu aer. Efectul lor interactiv are un impact deosebit asupra organismului uman, oferind relaxare pură și o regenerare completă. Sistemul de hidromasaj cu aer se bazează pe presiunea aerului generată de o pompă de aer. Fluxul puternic de aer comprimat care trece prin duzele de aer produce milioane de mici bule de aer care se amestecă cu apa și se deplasează cu viteză mare. Energia lor cinetică asigură masajul corpului dumneavoastră.

System functions:
- air pump
- water pump
- super water jets
- air jets
- electronic switch for water and air pumps
- air flow regulator min-max
- electronic regulation of the air pump rpm
- water level sensor
- overflow set
- bathtub support frame
- bathtub panel
- ○ high performance water pump, 6 water microjets with switch
- ○ 2 additional water microjets

Systemfunktionen:
- Luftpumpe
- Wasserpumpe
- Super-Wasserdüsen
- Luftdüsen
- elektronischer Schalter für Wasser- und Luftpumpe
- Luftstromregler Min/Max
- elektronische Regelung der Drehzahl der Luftpumpe
- Wasserstandsensor
- Überlaufgarnitur
- Badewannen-Untergestell
- Badewannenschürze
- ○ Hochleistungswasserpumpe, 6 Mikro-Wasserdüsen mit Schalter
- ○ 2 zusätzliche Mikro-Wasserdüsen

Rendszerfunkciók:
- légszivattyú
- vízszivattyú
- szuper vízfúvókák
- légfúvókák
- elektronikus kapcsoló a víz- és légszivattyúkhoz
- légáram-szabályzó min-max
- a légszivattyú fordulatszámának elektronikus szabályozása
- vízszint-érzékelő
- túlfolyó készlet
- fürdőkád tartókeret
- fürdőkád előlap
- ○ nagyteljesítményű vízszivattyú, 6 mikro vízfúvóka kapcsolóval
- ○ 2 további mikro vízfúvóka

Funcții ale sistemului:
- pompă de aer
- pompă de apă
- super jeturi de apă
- jeturi de aer
- întrerupător electronic pentru pompa de apă și pompa de aer
- regulator de flux de aer min-max
- reglare electronică a turației pompei de aer
- senzor nivel apă
- set de preaplin
- cadru de susținere pentru cadă de baie
- mască pentru cada de baie
- ○ pompă de apă cu performanțe ridicate, 6 micro-jeturi de apă cu întrerupător
- ○ 2 micro-jeturi de apă suplimentare
